## CAREER OBJECTIVE

---

I am a highly skilled and adaptable Full Stack Web Developer with a proven track record of creating dynamic and user-friendly web applications. With a passion for technology and over three years of professional experience, I have diligently refined my expertise in a variety of programming languages and frameworks. This experience includes honing my skills in both front-end and back-end development. In addition, I am also an expert in the MERN stack (MongoDB, Express.js, React, and Node.js) and have knowledge of Flask, Django, and Laravel, further enhancing my capabilities in web development.

My journey in web development began in 2020, and since then, I have consistently expanded my skill set and deepened my understanding of both front-end and back-end development. I pride myself on my ability to seamlessly integrate these two facets to deliver complete and robust web solutions. Whether it's building responsive user interfaces or designing scalable and efficient back-end systems, I bring a wealth of experience and adaptability to every project I undertake.

## ACADEMIC CREDENTIALS

---

### Bachelor of Science in Computer Science and Engineering

*(January, 2020 – Present)*

Brac University

Grade: 3.56 / 4.00

### Higher Secondary Certificate (HSC)

*(January, 2017 – December, 2018)*

Sylhet Government College, Sylhet

Grade: 4.25 / 5.00

### Secondary School Certificate (SSC)

*(January, 2012 – December, 2016)*

Sylhet Government College, Sylhet

Grade: 5.00 / 5.00

## TECHNICAL SKILLS

---

Software Applications	: Microsoft Word, Microsoft Excel, Microsoft PowerPoint
Programming Languages	: C, Python, JavaScript, Php, Git
Web Development	: Html, Css, Sass/Scss, React Js, Node Js
Frameworks	: Tailwind CSS, Bootstrap, Express Js, Flask
Databases	: MongoDB, Mysql
Development Tools	: VSCode, PyCharm, Google Colab, Jupyter Notebook, Postman
Information Retrieval and Research	: Google, ChatGPT, Stack Overflow, GeeksforGeeks, etc
Operating System	: Windows
Others	: Video Editing, Computer Graphics

## CO-CURRICULAR ACTIVITIES

---

- **General Member** at BUCC *(April, 2021 – present)*
- **Competitive Programmer** at Codeforce *(January, 2021 – present)*

## COMPLETED COURSES

---

- Build Responsive Real-World Websites with HTML and CSS [Course Link](#)
- Advanced CSS and Sass: Flexbox, Grid, Animations and More! [Course Link](#)
- The Complete JavaScript Course: From Zero to Expert! [Course Link](#)
- The Ultimate React Course: React, Redux & More [Course Link](#)
- Node.js, Express, MongoDB & More: The Complete Bootcamp [Course Link](#)

## PROJECTS

---

### Jail Management (Full-Stack Development)

[Github Repo](#)

- **Description:** Effectively managing prisoner activities and staff operations within a medium-sized prison is crucial for security and accountability. Our "Jail Management System" is designed to meet the specific needs of medium-sized correctional facilities, streamlining the monitoring of prisoners and staff activities.
- **Language and Framework used:** Flask · MySQL · JavaScript · Python (Programming Language) · HTML · Cascading Style Sheets (CSS)

### Blood Donation and Finding System (Full-Stack Development)

[Github Repo](#)

- **Description:** In the quest to enhance the efficiency and effectiveness of blood donation during emergencies, our innovative "Blood Donation and Finding System" project aims to simplify the process of finding blood donors quickly and accurately. This initiative harnesses the power of technology to facilitate rapid blood group identification through emergency posts, real-time chat support, and advanced filtering options.
- **Language and Framework used:** PHP · MySQL · HTML · Cascading Style Sheets (CSS)

### Who Wants To Be A Millionaire (Frontend Development)

[Github Repo](#) [Live Project](#)

- **Description:** My own version of 'Who Wants to Be a Millionaire'! Built entirely with React!
- **Language and Framework used:** HTML · CSS · React Js

### Smart Tech (Full-Stack Development) (Ongoing)

[Client Side](#) [Server Side](#)

- **Description:** This project aims to replicate the success and features of Bangladesh's renowned Star Tech company by developing a high-performance web application using the MERN stack (MongoDB, Express.js, React, and Node.js). With a focus on delivering a seamless user experience, this project will offer similar functionalities and performance to Star Tech, providing users with a top-tier e-commerce platform for technology products and services.
- **Language and Framework used:** MongoDB · Express Js · React Js · Node Js · Tailwind CSS · Context API · RESTful APIs · Axios
