CAREER OBJECTIVE

To leverage my skills in web development, machine learning, and app development as a software engineer, creating innovative and scalable solutions that drive business success while continuously expanding my technical expertise.

EXPERIENCES

Software Engineer Intern   *(November, 2024 – present)*
W3 Engineers Ltd

- Developing web applications using Next Js, MERN, Django, Flask, Golang, and Beego.
- Software testing using Automation and Selenium.
- Collaborating with team members using Microsoft Teams.
- Translating Figma designs into fully functional and pixel-perfect websites.
- Making RESTful APIs for back-end and test them using postman.
- Using GitHub for version control and collaboration on code repositories.

Technologies used: Next Js · MERN · Flask · Django · Golang · Beego · Selenium · Automation · Scrapy

Front-End Developer Intern   *(March, 2024 – June, 2024)*
6sense Technologies

- Developed web applications using React Js, Next Js, and Tailwind CSS.
- Implemented RESTful APIs with Axios, and conducted testing with Jest.
- Collaborated with team members using Slack and managed projects with Jira.
- Translated Figma designs into fully functional and pixel-perfect websites.
- Used GitHub for version control and collaboration on code repositories.

Technologies used: React Js · Next Js · Tailwind CSS · RESTful APIs · Axios · Jest · Figma · Zod · Redux · Jira · Less

PROJECTS

Blood Donation and Finding System   Github Repo

- **Features:**
    1. Hierarchical control over system permissions for administrators and users.
    2. Integrated platform facilitating real-time communication.
    3. Immediate notifications or requests for urgent blood donations.
    4. Sophisticated tools enabling precise data sorting and refinement.
- **Language and Framework used:** PHP · MySQL · HTML · CSS

Robots 2.0 (Discord Bot**)**   Github Repo Details Post

- **Features:**
  1. Music Player.
  2. Valorant Match Status.
  3. GitHub Status Updates.
  4. Web Scraping Capabilities.
  5. Exam and Deadline Scheduler
  6. BRACU Free Room Finder
- **Language and Framework used:** Flask · Python

Smart Tech   Client Side Server Side Live Project

- **Features:**
  1. Features enabling users to find and view comprehensive information about products.
  2. Seamless inclusion of payment methods for transactions.
  3. Customized interface and permissions based on user roles.
  4. Verification process using email to confirm user actions or registrations.
- **Language and Framework used:** MongoDB · Express Js · React Js · Node Js · Tailwind CSS · RESTful APIs · Axios

TECHNICAL SKILLS

Programming Languages   : C, Python, JavaScript, TypeScript, Php, Git
Frameworks and Tools   : Next Js, MERN, Flask, Mysql, Tailwind CSS, Bootstrap, SASS/SCSS, Less, Redux, Jest, Zod, Figma, Jira, Redux, Django, Selenium, Automation, Scrapy, Golang, Beego

ACADEMIC CREDENTIALS

Bachelor of Science in Computer Science   *(January, 2020 – June, 2024)*
Brac University
Grade: 3.52 / 4.00
